DETAILED ACTION

The receipt is acknowledged of applicants' preliminary amendment, filed 12/08/2003; drawings, filed 11/12/2004; IDS, filed 07/06/2004; IDS, filed 4/25/2005.

Under rule 1.126, claims 22 and 22 have been renumbered as claims 22 and 23 consecutively.

Claims 1-24 are included in the prosecution.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-62 of U.S. Patent No.

6,743,441. Although the conflicting claims are not identical, they are not patentably distinct from each other because patent claims and the instant claims are directed to the

same subject matter of a method of treating over active bladder with oxybutynin with minimum adverse anticholinergic adverse effects using a transdermal delivery comprising oxybutynin and permeation enhancer; and an article of manufacture to practice the claimed method. This is an anticipatory type of obviousness double patenting since the claims of the patent anticipate the instantly conflicted claims.

3. Claims 1-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24, as renumbered, of copending Application No. 10/286,436; claims 20-81 of copending Application No. 10/286,381; claims 1-41 of copending Application No. 10/731,039; claims 1-22 of copending Application No. 10/731,041; and claims 1-24 of copending Application No. 10/731,824. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of each of the copending application and the instant claims are directed to the same subject matter of a method for treating over active bladder with oxybutynin with minimum adverse anticholinergic adverse effects using a transdermal delivery comprising oxybutynin and permeation enhancer; and an article of manufacture to practice the claimed method.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
